

# **Adding Products to Google Photos**

#### Step 1

Open the link to your dedicated Google Photos album (your FCR Media Sales Rep will provide you with this link).

#### Step 2

Upload your product images to the Google Photos album by selecting your images from their folder on your PC/Mac and dragging them in to the screen (as per below screenshot), alternatively you can click the "Select from computer" button in the top right corner of the screen. When prompted, make sure to select "High Quality" when asked to choose your Upload size.

#### Step 3

Once you have uploaded your product images to your Google Photos album, you will need to find the URL for each of these images and add them to your product upload document. To do this, click on your first product image in your Google Photos album, this will enlarge the image on your screen, right-click on the image itself and select "Copy Image Location" as shown in the below screenshot.

### Step 4

Open your Product upload document as provided by your FCR Media Sales Rep and navigate to column H "Image", paste the image link you have copied into this cell by pressing "ctrl & v" or right clicking in the cell and selecting "paste".

## Step 5

Repeat this process for all your product images.
