

Sell product on any page with the ("Buy Now" button)

Add your products to a third party site: Great for online articles, blogs or forums you post on or have relationship with. If you have multiple websites for your business add a product to the sidebar or any other place on your site, Your customers will see your product and a "Buy Now" button and will be able to place an order. It works just the same as the whole online store.

Adding a product to a page

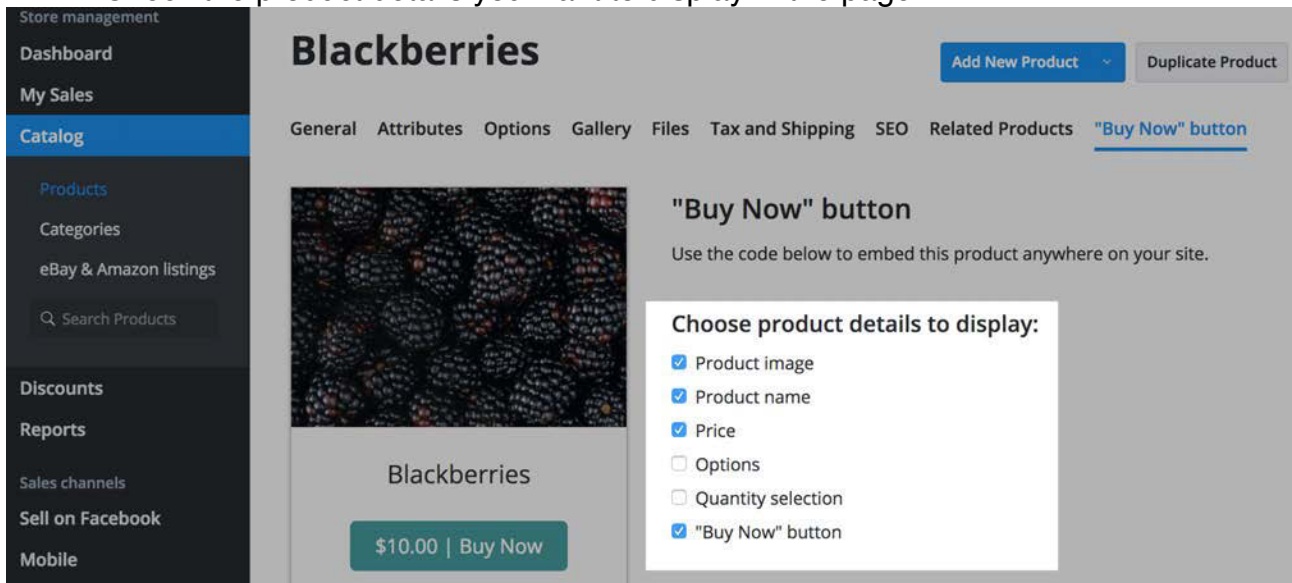

To add products to your pages or blog posts you need to copy the code of a product and paste it in the place where you want the product to show. You need to add the code to the source code of the page where you are adding the product. The exact steps depend on the sitebuilder or CMS you use.

To copy the code of a product do the following:

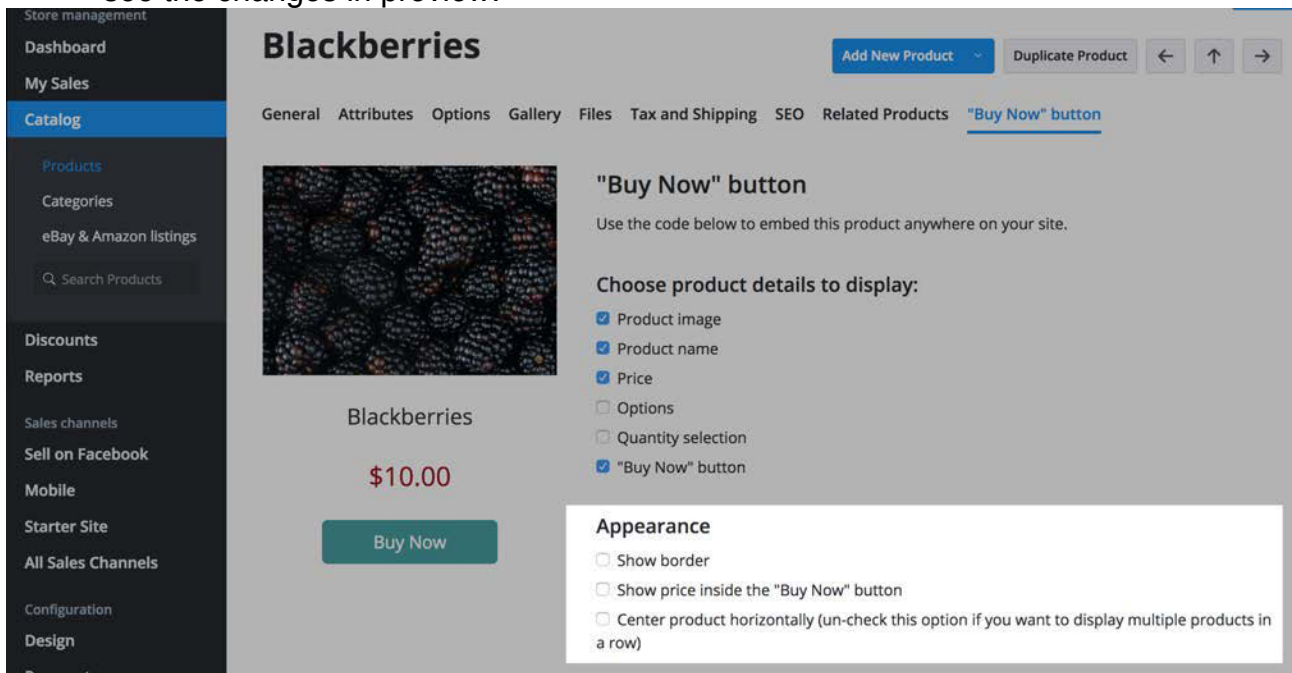

1. Go to your [Sitepro Control Panel](#) → [Catalog](#) → [Products](#).
2. Open the page of the product you want to add.
3. Open the **"Buy Now" button** tab:

The screenshot shows the Sitepro Control Panel interface for a product named "Blackberries". The "Buy Now" button tab is selected, showing a preview of the product with a "Buy Now" button and a list of options to display. The preview shows a product image of blackberries, the product name "Blackberries", and a price of "\$10.00 | Buy Now". The options to display are: Product image (checked), Product name (checked), Price (checked), Options (checked), Quantity selection (unchecked), and "Buy Now" button (checked). The appearance options are: Show border (checked), Show price inside the "Buy Now" button (checked), and Center product horizontally (checked).

4. Check the product details you want to display in the page:

5. Select the appearance options to make the product look the way you need. You will see the changes in preview:

6. Copy the code from the box below:

Products

My Profile

Blackberries

\$10.00

[Buy Now](#)

Choose product details to display:

- Product image
- Product name
- Price
- Options
- Quantity selection
- "Buy Now" button

Appearance

- Show border
- Show price inside the "Buy Now" button
- Center product horizontally (un-check this option if you want to display multiple products in a row)

Insert the following code into your site to embed the product:

```
<div class="ecwid ecwid-SingleProduct-v2 ecwid-Product ecwid-Product-96666537" itemscope itemtype="http://schema.org/Product" data-single-product-id="96666537"><div itemprop="image"></div><div class="ecwid-title" itemprop="name" content="Blackberries"></div><div itemtype="http://schema.org/Offer" itemscope itemprop="offers"><div class="ecwid-productBrowser-price ecwid-price" itemprop="price" content="10"><div itemprop="priceCurrency" content="USD"></div></div><div customprop="addtobag"></div></div><script data-cfasync="false" type="text/javascript" src="https://app.ecwid.com/script.js?</script>
```

You can also embed all your products at once using [Product Browser widget](#)

7. Paste the code to the source code of the page or blog post where you product should show.
